

VEKADECK ADDS TO YOUR OUTDOOR LIVING SPACE

VEKAdeck is the perfect way to add value and beauty to any home. VEKAdeck is a cellular processed PVC deck board designed to be one of the best performing boards available, making it ideal for homeowners, architects and builders who are seeking attractive, high-performance, ultra low-maintenance deck product.

The performance characteristics of VEKAdeck such as long life, high durability and ultra low maintenance requirements, along with a high return on investment and the material's environmentally friendly status make it an ideal board for residential and commercial dock applications.

As an alternative to both naturally durable lumber and composite deckboards, VEKAdeck has the added benefit that it may be used in direct contact with the ground without absorbing moisture or rotting.

VEKADECK FEATURES AND BENEFITS

Color Retention - VEKAdeck is fade resistant under normal weathering conditions.

Easy to Clean - Common spills generally clean with mild soap and water.

Lightweight - Cellular extrusion process makes VEKAdeck easier to handle than wood and composite materials.

Slip Resistant - Attractive embossed wood grain anti-skid surface is slip resistant when wet or dry.

Impact Resistant - Meets or exceeds the ASTM standards for breaks and punctures.

Fire Resistant - VEKAdeck self extinguishes in the event of fire.

Ultra-Low Maintenance - VEKAdeck never needs painting or sealing.

Easy to Install - VEKAdeck works as easily as traditional lumber using basic hand or power tools.

Easily Fastened - VEKAdeck easily accepts deck screws or hidden fasteners.

Dimensionally Stable - Patented formulation has a low expansion and contraction rate of less than 0.05% allowing for end to end butt joints.

Insect Resistant - VEKAdeck's 100% PVC blend is impervious to insect damage.

Splinter Proof - PVC compound will not crack, split, splinter, rot, flake or peel.

Environmentally Friendly - Safe, stable and recyclable VEKAdeck is UV and water resistant, periodic chemical treatments are not necessary.

Water Resistant - PVC is moisture resistant, making VEKAdeck ideal for high humidity or marine areas such as boat docks and swimming pools.

Matching Fascia - Color-matched fascia board made from the same PVC material is available.

EASY LIVING VEKADECK PRO

VEKA Outdoor Living Products are formulated with 100% pure PVC as well as micro ingredients that improve the characteristics of color retention and the weatherability of the vinyl formulation.

In the co-extrusion process, performance modifiers are concentrated in an outer layer while stabilizers and impact modifiers for durability and strength are blended into the inner core of the product. Our cellular process keeps weight down while adding to the workability of the finished board. VEKAdeck has a slight crown and radius edges ensuring proper water runoff. An embossed wood grain textured, non-slip finish results in a surface that is skid resistant, wet or dry.

At VEKA, we continue to work towards maintaining our leading edge in supplying the quality products you have come to expect. To this end, VEKAdeck has been tested by Architectural

Testing Inc. to the ICC-Evaluation Service AC174 criteria for structural properties, durability and surface burning characteristics, and has been shown to be a superior decking surface when installed in accordance with local building codes.

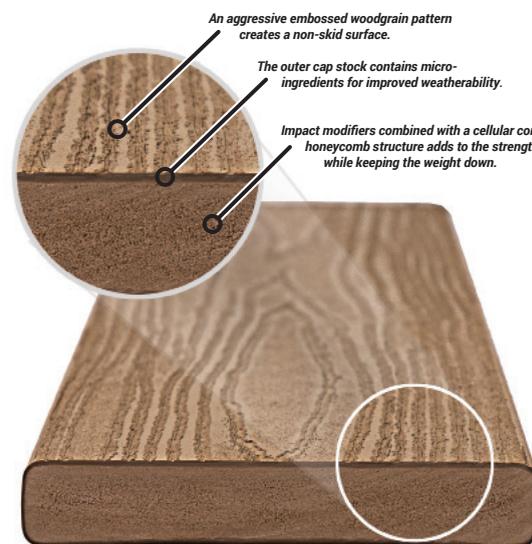

With the addition of low heat buildup pigmentation, VEKAdeck can maintain a significantly lower temperature difference as compared to other deck boards. This means that the VEKAdeck surface will remain cool and comfortable even in bare feet.

NOTE: Darker colors will exhibit a slightly higher surface temperature.

100% CELLULAR PVC

VEKAdeck Pro is not a composite and contains no organic material

VEKADECK & FASCIA BOARD

COLOR Selections

CCRR-0137
ATI-AA-676

Color is often the major factor when choosing decking material. VEKAdeck and matching fascia board comes in ten attractive colors: almond, mocha, white, gray, walnut, khaki, cayenne, hazelnut, espresso and storm to satisfy most requirements.

Due to variations in the printing process colors shown here may be different from the actual product.

Our PVC fascia board is made of the same proven formula as our decking. VEKAdeck PRO fascia board can be installed on curves and semi-circles for custom results.

Fascia Board Features:

- Available in a true 12" width.
- 7/16" thickness (.0437 in.)
- Attractive woodgrain pattern embossed to match VEKAdeck.
- Easily worked can be screwed or sawed.
- Low maintenance, never needs paint or stain, cleans easily, saves time and money.
- Limited lifetime warranty assures top quality.
- Available colors: White, Khaki, Gray, Almond, Mocha, Walnut, Cayenne, Hazelnut, Espresso and Storm.
