VEKAF-TRI.0217

VEKA OFFERS A FULL LINE OF VINYL PROFILES AND FENCE SYSTEMS

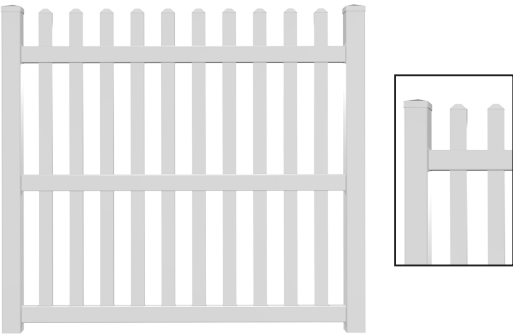

All of VEKA's vinyl fence profiles are made using state-of-the-art co-extrusion technology. The vinyl compound is blended with impact modifiers and UV inhibitors creating a fade-resistant, weatherable and durable material that outperforms most other fence material. Our DualEdge® profile is VEKA's solution

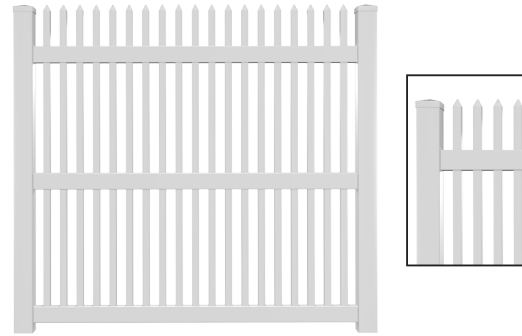

for the reuse of reclaimed material. The dual layers consist of VEKA's standard PVC outer shell, along with our own in-house captured PVC substrate. By using our own material we are assured that the highest quality ingredients are blended into the formulation, guaranteeing that DualEdge exceeds industry standards.

Our vinyl fence profiles allow for complete versatility in design and construction. Build your product as the systems shown or be as creative as you like. For an added flare consider using our Pinnacle woodgrain or solid color laminates on a privacy or semi-privacy style. See your sales representative or ask for the VEKA Pinnacle brochure for a closer look at the color options available.

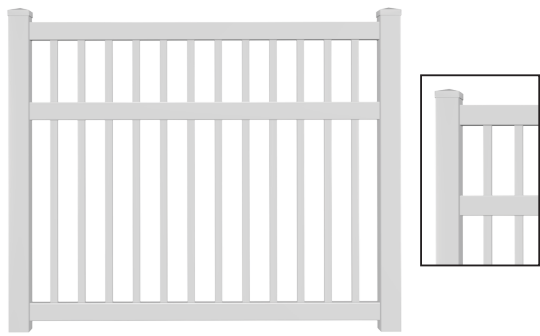

All VEKAfence products are available in three colors!
